PRICE INCREASE
January 1, 2022

Dear Valued Customers,

2021 continued to be an incredibly challenging year. Our industry is continuing to see unprecedented increases in raw materials, labor, and operating expenses. Unfortunately, these increases have made it necessary for Dandy Windows to implement a 10 % price increase, effective January 1, 2022.

Quotes entered and orders on or after January 1, 2022, will have the 10% increase applied. All quotes entered prior to January 1, 2022, will require updating to reflect the 10% increase. Please reach out to us for any concerns you may have.

On the positive side of things our manufacturer has completed the move to its new Aurora facility. We are now functioning out of our new manufacturing plant. This has allowed us to increase our production volume, establish a dedicated Pinnacle production line and soon incorporate an automated glass line.

As always, our goal is to continue to provide our customers with quality windows and provide industry leading service. We value your trust and look forward to working with you in 2022.

Thank you for your past and continued business,

Andrew Sokol
